|  | | Product name VERTICAL LIFTED CONSTRUCTION WITH ELECTRIC DRIVE LENGTH FROM L=2.10M TO L=4.00M |
| | | Article number 10 034 |
| | | Certificates/Attestations/Approvals Declaration of Conformity to Standards |
| Weight depending on size | Package dimensions depending on size | Unit pc. |
| Complementary products All types of frame mounted basketball boards | | |
| Product description Made of steel profiles, painted with powder varnish, it is fixed to the walls of the object. The electric drive allows the basketball board to be lifted up onto the wall of the sports hall. Designed for fixing all types of boards. Applied at the distance from the front of the board to the wall from 210 cm to 400 cm. Additionally equipped with lashings to stabilize the construction. | | |
