

RETRACTABLE SPECTATOR STAND

Art. no. 18 004 to 18 009

Retractable, telescopic stand with fixed or folding polyethylene seats. Stand can be made within the range of 3-16 rows. In sports halls stands are extended and retracted using wheels with ball bearings which do not damage or dent the flooring. The stands feature a set of protective barriers installed at the back and on the side of each module of the stand. Stand construction made from steel profiles powder coated in colour from RAL palette.

Platforms finished with waterproof, non-slip plywood. The risers are made of furniture board or steel sheet. Finishes made of aluminum angle.

Automatic protection system against uncontrolled folding of the stand during operation. Built-in system, when folding automatically, releases locks and allows smooth folding of the spectator stand.

Fixed or folding polyethylene seats. Colours to be determined.

Unfolded spectator stand.

Folded spectator stand.
