INSTRUCTIONS FOR ASSEMBLY AND USE OF SPORTS EQUIPMENT

Product: **Professional tennis lines Speziała II**

Code: 14 019

The Professional tennis lines Speziała II meets requirements of the PN-EN 913:2019-03 and PN-EN 1510:2006 standard: "Playing Field Equipment - Tennis Equipment. Functional and safety requirements, test methods".

1. Components

Number	Part/subassembly name	Quantity per product
1	24 running meters - side line 4, cm width	4
2	22 running meters - end line 4, cm width	1
3	30 running meters - "T" line /2x8mb/ and service line 5 cm wide	1
4	Anchor bolts	18

2. Installing tennis lines

- Measure the court and mark the corners.
- At a distance of about 5 centimetres from each corner, nail the profiled, cylindrical steel sockets to the ground. Start with the side and end line sockets.
- Start laying the end lines so that the socket hole matches the notch in the line. Nail the dowel through the line to a depth of 2/3 of the seat cylinder.
- Straighten the lines, install the tensioner on the opposite side outside the court.
- Hook in the tensioner and tighten it. Don't drag the line. Start laying the end lines so that the socket hole matches the notch in the line. Drive the second dowel into the depth of 2/3 of the cylinder.
- Push the lines into the ground using a hammer. Insert the pins into the whole length of the cylinder.

- g) Unwind the line and cut the tensioner using a small hand saw.
- h) Install the other lines in the same way.

3. Using the lines

- a) The lines are intended for playing tennis in outdoor grass and brick surface facilities.
- b) Periodically check the fastening elements of tennis lines.
